

CACAO DEFI LITEPAPER MARCH 2021

INTRODUCTION

In a growing market around the world, cryptocurrencies take relevance over the rest of the investments. Within this market, one of the main blockchain networks stands out: Binance Smart Chain. Unique for its simplicity of use for investors and highly recommended due to the low costs involved in its transactions. That is why we have developed not only a token that can be exchanged through this network, but we have also created a DeFi with which you can access all the coins available in the BSC.

CACAO FINANCE

CACAO FINANCE was born as a project seeking to encourage trust and reduce the uncertainty generated by these types of platforms today, with a team that leads and supports it 24 hours a day, and a community convinced that it will grow in every way.

CACAO FINANCE works as a decentralized Exchange developed through the open source of PancakeSwap, providing security and confidence to the project. In addition, the technologies developed by our programmers allow us to distinguish ourselves above the rest, for creating a highly reliable platform, in terms of safeguarding funds, and focusing strongly on the development of a community that is willing to grow together. In this LitePaper we will show you the main characteristics of our DeFi, our token and the main strategies we have to grow in the short, medium and long term.

CACAO

Cacao Finance presents its own BEP-20 token, CACAO, with the main objective of being listed in the main Exchanges. It will be a token that seeks stability in the short term and an upward trend in the medium and long term. Initially, the amount of tokens in circulation will be inflationary, until the development team considers it appropriate to stop generating tokens in order not to lose value in the short term.

TOTAL SUPPLY:

100.000 / 120.000 CACAOs

PRESALE'S PRICE:

1 CACAO = 0.0004 BNB

1 BNB = 2500 CACAO

TOKENS DISTRIBUTION:

INNOVATION

CACAO FINANCE uses an Automated Market Maker Model (AMM), this means that for the exchanges carried out in it, no order books are used, in this case the exchange is carried out with a liquidity fund. This will earn us additional profitability opportunities. This fund is made up of the tokens exchanged during the presale, and those deposited in the pool in exchange for an LP. That is why we highlight the importance of blocking liquidity, in this way you can ensure that no one steals your funds, AVOIDING ANY TYPE OF SCAM.

Liquidity blocking: through a contract, the liquidity provided by the different investors when forming an LP is totally blocked for those who have access to the development of the token. This makes it much safer to invest without worrying about a rug.

ROADMAP

25/3 – MARKETING AND SOCIAL MEDIA

25/3 – LAUNCH TOKEN IN BINANCE SMART CHAIN

27/3 – PRIVATE PRESALE

28/3 – LIMITED PUBLIC PRESALE

28/3 – BURN AND DEFINE TOTAL SUPPLY

28/3 – LAUNCH CACAO ON PANCAKE SWAP

28/3 – LAUNCH EXCHANGE SITE (CACAO DEFI)

30/3 – POOL & YIELD FARMING LAUNCH

Q2 – BURNING AND REBUYING STRATEGY

Q2 – CONFIDENCE AUDITING

Q2 – LISTING ON COINGECKO AND COINMARKET CAP

Q3 – ADD A NEW PROJECT

COMMUNITY

We seek to create a community that contributes to the governance of the currency, we understand the power of users, and we focus on creating value through constant feedback with investors. It is important that everyone can be heard, and that is why we will dedicate ourselves to providing them with that security that not many can offer.
